

# Contents

<b>I Introduction to CHR</b>	<b>13</b>
<b>1 Constraint Handling Rules</b>	<b>15</b>
1.1 Syntax and semantics of CHR . . . . .	15
1.2 Program properties . . . . .	25
1.3 CHR systems . . . . .	27
1.4 Example CHR programs . . . . .	29
1.5 The union-find algorithm . . . . .	31
1.6 Extensions of CHR . . . . .	34
1.7 Applications of CHR . . . . .	35
1.8 Related formalisms . . . . .	38
<b>II Implementation and Optimization of CHR</b>	<b>51</b>
<b>2 Basic Compilation</b>	<b>53</b>
2.1 Introduction . . . . .	54
2.2 Parsing and Normalisation . . . . .	54
2.3 Runtime Environment . . . . .	57
2.4 Code Generation . . . . .	60
2.5 Compiling the Guard . . . . .	64
2.6 Summary . . . . .	69
<b>3 The K.U.Leuven CHR System</b>	<b>71</b>
3.1 Introduction . . . . .	71
3.2 Implementation . . . . .	73
3.3 Optimizations . . . . .	73
3.4 Ports . . . . .	80
3.5 Experimental Evaluation . . . . .	82
3.6 Conclusion . . . . .	85
<b>III Execution Strategies</b>	<b>89</b>
<b>4 Rule Priorities</b>	<b>91</b>
4.1 Introduction . . . . .	91
4.2 Motivation and Examples . . . . .	93
4.3 CHR <sup>RP</sup> CHR with Rule Priorities . . . . .	98
4.4 Program Properties . . . . .	101
4.5 Basic Compilation of CHR <sup>RP</sup> . . . . .	104

4.6	Optimizing the Compilation of CHR <sup>rp</sup>	109
4.7	Benchmark Evaluation	113
4.8	Related Work	116
4.9	Conclusion	117
<b>5</b>	<b>Concurrent CHR</b>	<b>121</b>
5.1	CHR and Concurrency	122
5.2	Concurrent Goal-Based Refined CHR Semantics	125
5.3	Correspondence Results	129
5.4	Implementation of CHR, a Quick Review	132
5.5	Parallel CHR System in Haskell GHC	137
5.6	Experimental Results	147
<b>IV</b>	<b>Formal Analysis of CHR</b>	<b>157</b>
<b>6</b>	<b>Computational Complexity</b>	<b>159</b>
6.1	Introduction to Complexity Theory	160
6.2	CHR Machines	168
6.3	Complexity-wise Completeness	174
<b>7</b>	<b>Complexity Analysis of CHR<sup>rp</sup> Programs</b>	<b>197</b>
7.1	Introduction	197
7.2	Logical Algorithms and CHR <sup>rp</sup>	199
7.3	Translating Logical Algorithms into CHR <sup>rp</sup>	203
7.4	Translating a subset of CHR <sup>rp</sup> into Logical Algorithms	210
7.5	Implementing CHR <sup>rp</sup> , the Logical Algorithms Way	215
7.6	A New Meta-Complexity Result for CHR <sup>rp</sup>	225
7.7	Conclusions	233
<b>8</b>	<b>A Complete and Terminating Operational Semantics</b>	<b>239</b>
8.1	Introduction	240
8.2	Equivalence-based Operational Semantics	241
8.3	Constraint Handling Rules with Persistent Constraints	252
8.4	Merge Operator	258
8.5	Discussion	261
8.6	Related and Future Work	277
<b>9</b>	<b>Abstract Interpretation</b>	<b>283</b>
9.1	Introduction	283
9.2	The Refined Denotational Semantics $\omega_d$	284
9.3	The Abstract Interpretation Framework	289
9.4	Late Storage Analysis	293
9.5	Groundness analysis	299
9.6	Implementation and Evaluation	305
9.7	Conclusion	307

<b>Appendix</b>	<b>311</b>
A.1 Most Influential Papers, So Far . . . . .	312
A.2 Literature available on CHR . . . . .	313
A.3 CHR Researchers by Country . . . . .	315
